Bobcat Trail Community Center
1352 Bobcat Trail Boulevard
North Port Florida 34288

1. **Call to Order**

   The meeting was called to order at 12:01 PM.

2. **Roll Call/Statement of Quorum**

   Present at the meeting representing the Bobcat Trail Landscape Committee (BCTLC) were Jeff Brall, Val Duemmel, Laura Filler and Bill Hadovski. Scott Acton and Jeff Tamayo were present representing Artis Tree. Residents Darryl and Donna Smith, and Wayne Drury were present part time.

3. **Approval/Adoption of Agenda**

   The July 15, 2025, Bobcat Trail Landscape Committee Meeting Agenda was approved as modified. (See Attachement 1)

4. **Public Comment on Agenda Items**

There was no public comment on the agenda. One of the residents in attendance explained that they had an issue with ground repair after significant repair work had been done on the water main in their yard. After a brief discussion it was determined that this is a Fairways Commons issue and should be referred to them.

5. Meeting Minute Approval

The meeting minutes for June 17, 2025, BCTLC meeting were approved as issued.

6. Old Business

A. Review of the Contract Matrix, (Refer to Attachment 3)Artis Trees' work is in line with the July matrix requirements except as follows:

(1) Due to a ban on the use of nitrogen and phosphates Artis Tree has not done the July fertilizers application to the turf. Artis Tree agreed to try and find a turf fertilizer product that did not contain nitrogen or phosphates.

(2) Artis Tree reported that they use the same chemical insecticide for shrubs, turf and fire ants. They treated for all three last week. Artis Tree agreed with the Committee that insects seem to be more prevalent this year than in the past. Artis Tree shared that they do not have the insecticide options they had in the past. They are limited to one product, and they speculated that the insects are building a resistance to it.

(3) The area around the deep well needs to be cut.

(4) Palm tree trimming was discussed; Artis Tree shared with the committee that the concept of trimming the palms to help them withstand the effects of a hurricane was a misconception. Artis Tree thought it would be better to trim the trees later in the year. They also recommend not taking off froms that were still green

and though it would help with cleanup, taking the seed pods off often resulted in damage to healthy froms which had an overall negative effect on the tree. The committee was concerned that if we did not get the palm trees trimmed before the new contract year (starts in October) that we would be trimming twice in one contract cycle. Artis Tree offered to trim the palms in one day increments over several weeks starting in July or doing then all at once in September. It was agreed that we would do them all at once in September.

(5) Attachment 4 is a Palm Count of all the large (greater then 15 ft.) palm trees located in both Zone 1 (Commercial side) and Zone 2 (Resident/Golf Course side). This list was developed jointly between Artis Tree and the Bobcat Trail Landscape Committee (BCTLC).

(6) Though Artis Tree is responsible for keeping the Oak Tree lower limbs (< 17ft) trimmed so as not to impede vehicle or pedestrian traffic, they are not responsible for the overall trimming of the oak trees. It was decided that Artis Tree would coordinate getting a quote from another vendor to get the oak trees trimmed. Bill Hadovski will work with the vendor getting the quote developed. It was estimated that there are seventeen Oak Trees that need to be trimmed.

B. Bobcat Trail Aquatic and Landscape Inspection Report for June 2025, by Rizzetta & Company John Fowler Landscape Specialist (Landscape sections only). (Refer to Attachment 2)

(1) As a general comment Artis Tree has a copy of the Fowler report and will address appropriate issues during the normal cycle of their trim crew and insecticide team.

(2) Specifically, they will look at areas of stressed turf and possible insect infestation (Item, 1,2,4,5, 7, 14, and 18.)

(3) Clean up Cat Palms around monuments. (refer to discussion under monuments below).

(4) Number 10, Plumeria in question was planted by the resident of the adjoining property and is not a CDD/Artis Tree responsibility.

(5) Report indicates that there is a Queen Palm behind the exit monument of Royal Palm and Bobcat Drive that looks stressed and may need some attention, No one on the committee or Artis Tree were aware of this issue. Artis Tree took the action to go look at the tree and take appropriate steps to address the issue.

(6) Weeds are an issue around the monuments on the rear gate. In addition, weeds are starting to push through the fence along Woodhaven and need to be cut back. Also, tree limbs (south of the back gate) interfere with pedestrian and bicycle traffic and need to be trimmed back.

(7) Item 17 of the report details the problem with the new sod near the Pool House. It has been decided that 25 new pieces of sod will be brought in to replace the sod that did not take root.

(8) As a general comment it was pointed out the shrubs around the pool need to be trimmed.

(9) Report item 16, issues with the Community Center entrance Copperleaf plants. These plants have been trimmed back. They are still alive; it is believed that the original problem was irrigation and that has been resolved. These plants are known to be hardy and it is expected that they will recover.

(10) Item 19 (New Flowers Back Gate) see section on flowers below.

C. The annual flowers will be installed on Wednesday. To address the flower cycle, we missed earlier this year we will get an extra one hundred plants this cycle, also on the next cycle and fifty on the cycle after that. The additional plants will be added to the Bull Nose on Toledo Blade, some in front of the front guard house, and some at the back gate.

D. It was reported that the Street Monuments look good, that an effort is underway to look at the back of the monuments and get this area cleaned and trimmed up. It was requested that the Cat Palms be trimmed up so that they are just barely flowing over the monuments.

E. Under the Tree, Commercial Side, Woodhaven and Toledo Blade

(1) Attachment 5 details the current status of these areas. The information was discussed with Artis Tree, and they agreed to take appropriate action.

F. Miscellaneous

(1) It was reported that constant dedicated power has been provided to the irrigation controller near the Community Center, this issue is complete and closed.

(2) It was reported that mulch will be delivered in August. We will receive 390 cubic yards at 70$ per yard (Total $27,300 included in Artis Tree contract)

(3) Palm Tree Trimming refer to 6.A.(4) above

G. Shoval Ready Projects

(1) The current phase of the work on the Commercial side is compete and all (including notes 3 in the Fowler report) indicate that it looks good.

(2) The work in front of the Guard House is also complete and looks good except for the concrete retaining boarder planned to separate the gravel directly in front of the guard house and the planting area. The boarder has not been installed, and its installation schedule is not available.

(3) The Sod /Mulch enhancement project is still evolving, the Landscape Committee Chair and a representative from Artis Tree will review the various areas on July 25 and determine how much sod is required.

(4) A new shovel ready project has been defined; it is to put Ginger plants around the stumps from the pine trees that were cut down near the Community Center. The purpose of the planting is to

cover the stumps without incurring cost to remove or grind them down.

H. 5 Year Plan (Refer to Page 2 of Attachement 1)

(1) Item 1 Leave in plan for now. May need to have additional discussion with the new Maintenance Supervisor. Some are concerned that the current approach may not be viable.

(2) Item 2 Area F, no action at this time however it was noted that this is a very nice area and with the addition of some trees (Shady Ladies) and park benches it would add a nice attractive feature to our community. The major obstacle at this time is irrigation. Without irrigation it is a waste of money to add any tress or other plants. The area is currently irrigated by the Golf Course irrigation system. To realign the system with the CDD system or FWC irrigation system is cost prohibited. It is hoped that the golf course will be reestablished, and irrigation will be supplied by them.

(3) Item 3 has been revised to add Ginger plants around the pine tree stumps to obscure them from view. Quote for effort is in progress.

(4) Item 4 Mulch /Sod project in progress next step will take place July 25.

(5) Item 5 Still in the plan.

(6) Item 6 is Still in the plan.

(7) Item 7 deleted from the Plan, the current Landscape Company does not have resources to supply service.

(8) Item 8 Still in plan.

(9) Item 9 Still in the plan. The park bench project research slowed down some when it was determined that concrete slabs would have to be provided on which to mount the benches.

I. The front entrance Guard house is being redecorated. It is no longer available to be used as a storage space for Christmas decoration. All Christmas decorations need to be moved to the attic of the Community Center as soon as possible.

J. It was reported that as a result of fixing the lights for the Community Center sign there is now power available on the Bobcat Trail medium strip across from the Community Center.

K. Budget

(1) FEMA has requested additional information to support our revised application for FEMA disaster funds. We have been told that this is unusual and may be reason to believe our revised application is being seriously considered.

(2) We continue to work with Representative Steube's office to see if there is any additional assistance they can provide to support our efforts to obtain FEMA Disaster Relief.

(3) There is still no news on the distribution of the funds we should have received as a result of the Golf Courses last tax payment. A number of inquiries have been made to the management company. 112K$ is due to the BCTLC and 12K$ is due Fairway Commons (FWC)

(4) BCTLC 2026 Landscape Budget

- Budget very tight based on not increasing Taxes
- Bare bones budget, little opportunity for additional spending
- If FEMA Funds are received and when the money from the golf course is received it will go into a reserve fund to address future storm response

7. Public comment

Compliance Audit Overview

The Community Website Compliance Audit (CWCA) consists of a thorough assessment of Florida Community Development District (CDD) websites to assure that specified district information is available and fully accessible. Florida Statute Chapter 189.069 states that effective October, 2015, every CDD in the state is required to maintain a fully compliant website for reporting certain information and documents for public access.

The CWCA is a reporting system comprised of quarterly audits and an annual summary audit to meet full disclosure as required by Florida law. These audits are designed to assure that CDDs satisfy all compliance requirements stipulated in Chapter 189.069.

Compliance Criteria

The CWCA focuses on the two primary areas – website accessibility as defined by U.S. federal laws, and the 16-point criteria enumerated in Florida Statute Chapter 189.069.

ADA Website Accessibility

Several federal statutes (American Disabilities Act, Sec. 504 and 508 of the Rehabilitation Act of 1973) require public institutions to ensure they are not discriminating against individuals on the basis of a person's disability. Community websites are required to conform to web content accessibility guidelines – WCAG 2.1, which is the international standard established to keep websites barrier-free and the recognized standard for ADA-compliance.

Florida Statute Compliance

Pursuant to F.S. 189.069, every CDD is required to maintain a dedicated website to serve as an official reporting mechanism covering, at minimum, 16 criteria. The information required to report and have fully accessible spans: establishment charter or ordinance, fiscal year audit, budget, meeting agendas and minutes and more. For a complete list of statute requirements, see page 3.

Audit Process

The Community Website Compliance Audit covers all CDD web pages and linked PDFs.* Following the WCAG 2.1 levels A, AA, and AAA for web content accessibility, a comprehensive scan encompassing 312 tests is conducted for every page. In addition, a human inspection is conducted to assure factors such as navigation and color contrasts meet web accessibility standards. See page 4 for complete accessibility grading criteria.

In addition to full ADA-compliance, the audit includes a 16-point checklist directly corresponding with the criteria set forth in Florida Statute Chapter 189.069. See page 5 for the complete compliance criteria checklist.

* **NOTE**: Because many CDD websites have links to PDFs that contain information required by law (meeting agendas, minutes, budgets, miscellaneous and ad hoc documents, etc.), audits include an examination of all associated PDFs. **PDF remediation** and ongoing auditing is critical to maintaining compliance.

Accessibility overview

Everyone deserves equal access.

With nearly 1-in-5 Americans having some sort of disability – visual, hearing, motor, cognitive – there are literally millions of reasons why websites should be fully accessible and compliant with all state and federal laws. Web accessibility not only keeps board members on the right side of the law, but enables the entire community to access all your web content. The very principles that drive accessible website design are also good for those without disabilities.

The legal and right thing to do

Several federal statutes (American Disabilities Act, Sec. 504 and 508 of the Rehabilitation Act of 1973) require public institutions to ensure they are not discriminating against individuals on the basis of a person's disability. Community websites are required to conform to web content accessibility guidelines, WCAG 2.1, the international standard established to keep websites barrier-free. Plain and simple, any content on your website must be accessible to everyone.

ADA Compliance Categories

Most of the problems that occur on a website fall in one or several of the following categories.

Contrast and colors

Some people have vision disabilities that hinder picking up contrasts, and some are color blind, so there needs to be a distinguishable contrast between text and background colors. This goes for buttons, links, text on images – everything. Consideration to contrast and color choice is also important for extreme lighting conditions.

Using semantics to format your HTML pages

When web page codes are clearly described in easy-to-understand terms, it enables broader sharing across all browsers and apps. This 'friendlier' language not only helps all the users, but developers who are striving to make content more universal on more devices.

Text alternatives for non-text content

Written replacements for images, audio and video should provide all the same descriptors that the non-text content conveys. Besides helping with searching, clear, concise word choice can make vivid non-text content for the disabled.

Ability to navigate with the keyboard

Not everyone can use a mouse. Blind people with many with motor disabilities have to use a keyboard to make their way around a website. Users need to be able to interact fully with your website by navigating using the tab, arrows and return keys only. A “skip navigation” option is also required. Consider using WAI-ARIA for improved accessibility, and properly highlight the links as you use the tab key to make sections.

Easy to navigate and find information

Finding relevant content via search and easy navigation is a universal need. Alt text, heading structure, page titles, descriptive link text (no ‘click here’ please) are just some ways to help everyone find what they’re searching for. You must also provide multiple ways to navigate such as a search and a site map.

Properly formatting tables

Tables are hard for screen readers to decipher. Users need to be able to navigate through a table one cell at a time. In addition to the table itself needing a caption, row and column headers need to be labeled and data correctly associated with the right header.

Making PDFs accessible

PDF files must be tagged properly to be accessible, and unfortunately many are not. Images and other non-text elements within that PDF also need to be ADA-compliant. Creating anew is one thing; converting old PDFs – called PDF remediation – takes time.

Making videos accessible

Simply adding a transcript isn't enough. Videos require closed captioning and detailed descriptions (e.g., who's on-screen, where they are, what they're doing, even facial expressions) to be fully accessible and ADA compliant.

Making forms accessible

Forms are common tools for gathering info and interacting. From logging in to registration, they can be challenging if not designed to be web-accessible. How it's laid out, use of labels, size of clickable areas and other aspects need to be considered.

Alternate versions

Attempts to be fully accessible sometimes fall short, and in those cases, alternate versions of key pages must be created. That is, it is sometimes not feasible (legally, technically) to modify some content. These are the 'exceptions', but still must be accommodated.

Feedback for users

To be fully interactive, your site needs to be able to provide an easy way for users to submit feedback on any website issues. Clarity is key for both any confirmation or error feedback that occurs while engaging the page.

Other related requirements

No flashing

Blinking and flashing are not only bothersome, but can be disorienting and even dangerous for many users. Seizures can even be triggered by flashing, so avoid using any flashing or flickering content.

Timers

Timed connections can create difficulties for the disabled. They may not even know a timer is in effect, it may create stress. In some cases (e.g., purchasing items), a timer is required, but for most school content, avoid using them.

Fly-out menus

Menus that fly out or down when an item is clicked are helpful to dig deeper into the site's content, but they need to be available via keyboard navigation, and not immediately snap back when those using a mouse move from the clickable area.

No pop-ups

Pop-up windows present a range of obstacles for many disabled users, so it's best to avoid using them altogether. If you must, be sure to alert the user that a pop-up is about to be launched.
