EASEMENT OCCUPATION AGREEMENT

THIS AGREEMENT, is made this ____ day of _____, 2026, by and between the **BOBCAT TRAIL COMMUNITY DEVELOPMENT DISTRICT**, whose mailing address is _____, (hereinafter the "District"), and **BRUCE TURNER and CATHIE TURNER, husband and wife**, whose mailing address is 2662 Royal Palm Drive, North Port, FL 34288 (hereinafter the "Owner").

RECITALS:

Owner is the fee simple title holder of that certain parcel of land located in Sarasota County, Florida, described as follows:

Lot 4, Block E, BOBCAT TRAIL, according to the Plat thereof, as recorded in Plat Book 39, Page(s) 21, 21A through 21N, inclusive, of the Public Records of Sarasota County, Florida (hereinafter "Owner's Property").

Parcel Identification Number: 1140-16-0504

The North and West side of Owner's Property is encumbered by a 10-foot drainage and utility easement in favor of the District (hereinafter the "Easement").

A portion of the improvements constructed on Owner's Property encroach into the Easement, including two and a half feet of the masonry and frame and a concrete slab on the North side and a concrete driveway on the West side.

All encroachments are depicted on a survey prepared by Lemonde Mortgage Surveys, Inc., bearing File No. 13-09-11 and completed October 1, 2013 (hereinafter the "Survey"). A copy of the Survey depicting the encroachments is attached hereto as Exhibit "A" and hereby incorporated herein.

The District is the beneficial owner of the Easement and the District is willing to allow the encroachments depicted in the Survey to remain undisturbed upon certain terms and conditions.

In consideration of this Agreement and other good and valuable consideration, the adequacy and receipt of which is hereby acknowledged, District and Owner do hereby agree as follows:

1. District agrees that the encroachments depicted in the Survey may remain in their depicted form and District shall allow Owner's improvements shown on the Survey to occupy the Easement to the same extent and in the same manner as depicted in the Survey. Owner shall take no action that

would cause further encroachments than those depicted in the Survey.

2. The privilege granted by District to Owner is made with the express condition that neither the Owner, nor the Owner's heirs, successors, assigns, or any person claiming by, under or through Owner, shall acquire any right superior to the District or the public in such dedicated or recorded Easement, whether through lapse of time or otherwise.

3. This Agreement shall remain in full force and effect only so long as the encroachments remain in the Easement and that upon removal, demolition, or destruction thereof, the encroaching improvements shall not be replaced within the Easement.

4. District has the right to conduct maintenance in the Easement as authorized under the existing grant Easement, but will take reasonable precautions to prevent or minimize damage to any improvements within the Easement.

5. Owner agrees to indemnify, defend and hold the District harmless from any and all claims of liability arising from or occasioned by Owner's occupation of the Easement, and further agrees to be responsible for any costs incurred in defending District from such claims of liability, including attorney's fees, which may be incurred by District.

6. Owner shall be responsible for all costs incurred by either Owner or District related to repairs or maintenance of the Owner's improvements or the District's infrastructure arising from or occasioned by Owner's occupation of the Easement.

7. The provisions hereof shall operate as a covenant running with the land and shall bind the parties hereto and their successors and assigns.

[Signature Pages to Follow]

IN WITNESS WHEREOF, the parties hereto have executed this Easement Occupation Agreement as of the date first written above for the purposes herein expressed.

12.Public Comment on Agenda Items

There was no public comment on the agenda.

13.Old Business

A. Artis Tree Matrix Report

(1) It was noted that fire ants seem to be more prevalent on the monuments at the front entrance. Artis Tree agreed to review the situation and take appropriate action.

(2) It was noted that the Fire Bushes on each side of the entrance front monument were not even, the right one needs to be trimmed and the one on the left allowed to grow out, Artis Tree agreed to take care of it.

(3) A discussion with Artis Tree related to insuring we get four annual applications of fertilizer. Artis Tree committed to four applications and stated that if needed they would put down a custom mix that was compliant with Florida restrictions.

(4) Artis Tree reported that the pine trees behind homes on Fishkill would be topped February 11, the work will be done by Green Tops.

(5) It was confirmed that except for one area the Oak Tree vertical clearance does not need to be trimmed. The one area is on Woodhaven sidewalk going east close to the canal bridge. It was also noted that the overall Oak Trimming project that was put on hold last year needs to be revisited.

(6) It was pointed out that the mulch put down in November was pretty thin in spots. The BCTLC explained that they were looking at a different type of application, that used a blow on/in method. Initial evaluation indicated a potential cost savings and possibly a more even application.

(7) Noted that CDD beds and mulch behind homes on corner of Royal and Bobcat were not being detailed consistently with other areas.

(8) Turf behind the Monument on corner of Royal and Bobcat is brown and non-existent. It was noted that the controller on the associated CDD well was not working correctly and we were waiting for Artis Tree to repair it. It was noted that there were significant brown and some bare spots on the commercial side. It was pointed out that the commercial side was a mix of weeds, and various broadleaf plants. Most plants brown up during the dry season and to some degree it was felt that this was the issue. It was still suggested that irrigation coverage be checked.

(9) The effectiveness of Artis Tree wet checks was discussed. There is concern that the coverage of the rotary sprinkler heads is not being checked. Artis Tree explained that they look at the grass, and if the grass is green in the areas that sprinklers are supposed to cover, they assume that the rotary head is covering the desired area. They still look at each

individual head to see if it is activating and properly distributing water.

(10)The annuals at the gates were killed by frost and will be removed; new plants will be installed in March. It was noted that plant selection might have to take into consideration what is available, the nursery also had frost damage, and some pants may be in limited supply.

B. Fowler Report

(1) It was noted that some areas of the median strip on Bobcat Trail and Bobcat Village Center Road were still brown, some of this related to the CDD Well Controller repair. If there are areas of fungus Artis Tree needs to look and treat accordingly.

(2) Artis Tree feels that the palm is missing nutrients. It was decided to apply appropriate nutrients and see if we can get the palm to a healthier state.

(3) The area (Bobcat Village Center Dr North) has already been treated; chemical application will help with insects and help eliminate the broadleaf issues.

(4) Continue to observe, ongoing.

(5) Continuing, ongoing challenge, will continue to treat.

(6) Will monitor and ensure turf filles in.

(7) Done

(8) Being treated.

(9) Over 200 Petit Ixora were installed around the Community Center by LMP. They have never done as well as they should have. Artis Tree recommends we get the soil checked, estimated that it will take two weeks.

(10)In addition to removing the Witches Broom there was a discussion related to trimming back the grasses around the community center and along Bobcat Trail (area F). Artistree recommended we wait a month until we were further along in the dry season. Trimming the grass stresses the plants and it would be better to wait. It was noted that some of the grass plants have ant mounds in and around them, Arti Tree stated that we could treat the insects

now without trimming the grasses or treat for insects when we trim the grasses.

(11)This is the area where the turf was replaced in the past year. It has been struggling since it was installed. Artis Tree to investigate and provide recommendations.

(12)Artis Tree will look at area and raise the vertical clearance, probably this coming week.

(13)Will schedule the rejuvenation cut back of the Oleanders for this coming March.

(14)Will defer at this time.

(15)Not CDD property.

(16)The area has been treated for fungus and is recovering.

(17)To avoid stressing plants the effort has been put off until March.

(18)Ongoing will follow up with Artis Tree.

(19) Complete

(20)Complete

C. Street Monuments

No new issues to discuss at this meeting.

D. Commercial/Woodhaven/Toledo Blade/under the Trees

(1) See Attachment 4.

14.5 Year Plan

A. Sod Enhancement and Irrigation Quote

(1) Projects have been combined.

(2) Sod to provide barrier between monument bed and sidewalk to better hold mulch in place.

(3) Current irrigation bed drip lines will not provide enough water to irrigate sod/turf.

(4) Need quote to modify irrigation system.

(5) Measurements for sod enhancements have been taken and scope has been detailed.

(6) Waiting for a quote from Artis Tree

B. Monument Beautification

(1) Need Artis Tree Quote.

(2) Not all monuments need to be redone; Artis Tree has the list.

(3) Removing existing plantings.

(4) Prep soil for new plants.

(5) Planting Cat Palms.

15.Holiday Decorations

General discussion related to decorating Bobcat Trail for the Holidays. The three vendor quotes received so far, Reference Attachments, 6,7,8 were discussed with an expressed desire for the BCTLC to come up with a design based on these quotes. One design had been submitted via separate email and was briefly discussed. (Attachment 11).

Public Comments

No public comments on Agenda

Old Business

A. Easement Occupation Agreement: The Agreement was reviewed with the board and will be added to the agenda for the 4-7 meeting.

New Business

A. Paving Project Proposal: The proposal from Superior Asphalt was presented to the board. Supervisor Ball will have additional proposals to review at the 4-7 Meeting.
B. Discussion with Joe Medred: Joe Medred from JM Planning and Development reviewed the plan to build an apartment complex on the corner of Woodhaven and Toledo Blade. The North Port Planning & Zoning Advisory Board will meet on April 2nd to review the plan, which is a public Hearing.

C. Temporary Easement Access: Supervisor Ball reviewed the Agreement with the board.
D. Monument Landscape: Supervisor Brall discussed the landscape committee plan to add palm trees behind the monuments. The committee wants to confirm monuments are on CDD property as well as the locations of setbacks. Supervisor Ball will have the district engineer review the site plans.

Resident Concerns
No Resident Concerns

Supervisor Updates
A. Supervisor Fisher will put out the newsletter. Supervisors budgets are due.
B. Supervisor Brall reviewed that the commercial side needs work and will build project plans. He also requested the tax assessment revenue for the golf course be broken out into line items.
C. Supervisor Ball stated the lake banks will be treated for weeds in the coming weeks.
D. Supervisor SanAntonio explained the new alarm system and new Wi-Fi network will be installed. There were two gate strikes last week. Wind screens were ordered for the tennis court. The new agreement with Frontier will save the District $579 per month. He also created an incident report document to be put on file when a resident or guest has an injury at the community center.
E. Supervisor Branch is getting quotes to re paint the pool deck. He also reviewed that PRV #13 is still having water pressure issues that he is investigating.

Public Comments
A comment was made regarding Monuments and CDD ownership.

AQUATICS AND LANDSCAPE INSPECTION REPORT

March 19, 2026

Aquatics Inspection Section

EXECUTIVE SUMMARY

- **Overall, the lakes throughout the community appear to be in generally good condition, with shorelines, littoral shelves, and surrounding banks showing typical maintenance needs for a multi-lake system. Water levels remain lower than ideal but have begun to show signs of improvement compared to the previous visit, likely due to the new well and pump system as well as slightly increased rainfall. Across several lakes, localized areas of invasive vegetation, bank erosion, and minor washouts were noted, representing routine issues commonly found in aging aquatic environments. Some lakes exhibited pockets of turbidity, debris, or weed encroachment, all of which can be addressed through standard aquatic and shoreline maintenance practices.**

Ponds West of Toledo Blade Blvd..

1. Pond behind the office buildings West of Toledo Blade Blvd.
    a) Lake level is low.
    b) Please treat unwanted vegetation in littoral shelf.
    c) Overall pond looks well maintained.

2. Pond behind the hospital West of Toledo Blade Blvd.
    a) Pond looks good overall and appears healthy.

Pond D and A1

3. Pond D:
    a) Pond level is rising with the addition of the new pump and well.
    b) Treat undesirable vegetation on the littoral shelf.
    c) Treat vegetation along north / east banks.

4. Pond A1:
    a) Overall observed to be in good condition.
    b) Potential washout forming on the southeast bank.
    c) Pond level is low.
    d) Treat the minor vegetation along the southeast bank

Pond A2 and E

5. Pond A2:
    a) Noting previously observed in the washout.
    b) Pond clarity is low. Please investigate and treat if applicable.
    c) Please treat any undesirable vegetation on the littoral shelf.
    d) Pond is low, but improved

6. Pond E:
    a) Pond water level is low, but improving.
    b) Please continue treat undesirable weeds on southern banks and riprap.

Pond F1 and F2

7. Pond F1:
    a) Pond looks overall healthy and well maintained
    b) Pond is low.

8. Pond F2:
    a) Small new washouts forming along the eastern banks.
    b) Please treat undesirable vegetation along the western banks. (more pictures than featured in report)
    c) Please remove palm fronds
    d) Please treat weeds on littoral shelf

Pond F3 and H2

9. Pond F3:
    a) Water discoloration previously observed no longer present.
    b) Please treat light vegetations on the southern bank(s).

10. Pond H2:
    a) Algae is reduced in this pond relative to previous visit.
    b) Treat undesirable banks near southwest culvert and within rip-rap.
    c) Potential washout forming on the eastern bank, maybe more than one near the homes.
    d) Water is very low, slightly higher level.

Pond G and H1

11. Pond G:
    a) Noting signs of vegetations treatment on the littoral shelf
    b) Pond is good condition.
    c) Pond level is low.

12. Pond H1:
    a) Noting washout forming on the east bank. Another on littoral shelf bank.
    b) Littoral shelf showing signs of treatment.
    c) Pond is low.
    d) Palm fronds observed in littoral shelf.

Pond J1, J2, and J3

13. Pond J1
    a) Pond is in healthy condition.
    b) Alligator present at time of visit
    c) Treat weeds along the pond bank.

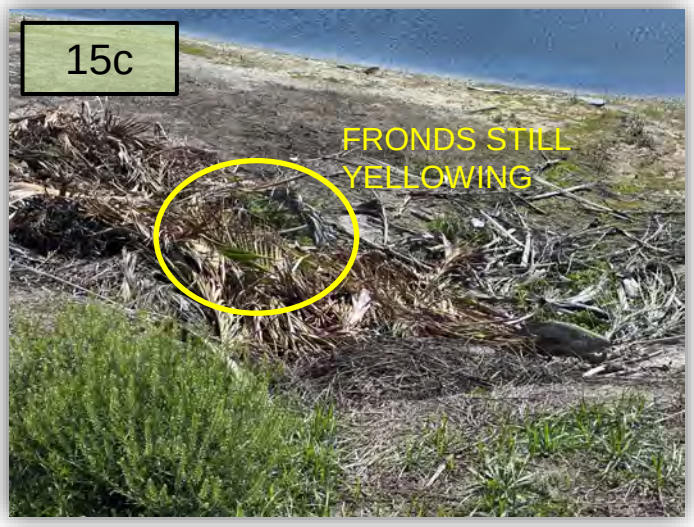

14. Pond J2
    a) Continuing to monitor washout forming from the backs of the homes.
    b) Treat weeds starting to pop along the lake bank, especially the north/ north west.
    c) Washout formed on the southern bank of the north potion of the lake.

15. Pond J3
    a) Treat weeds starting to grow along the pond edge.
    b) Debris along the edge of the pond.
    c) Washout remains full of debris. Some appear new. Weeds growing within.
    d) Please treat littoral shelf for weeds.

Pond M and I

16. Pond M:
    a) Overall, the pond looks good and appears healthy.
    b) Monitoring two expanding washouts on the southern bank.

17. Pond I:
    a) Overall, pond appears healthy, just low levels.
    b) Treat undesirable vegetation on the banks.
    c) Remove palm fronds in the pond.

Pond K1, K2, and C

18. Pond K1:
    a) Noting potential algae bloom on the western portion of the lake has been reduced.
    b) Water clarity slightly reduced from previous visit.

19. Pond K2:
    a) Overall pond health is good with clear banks
    b) Water clarity slightly reduced.
    c) Treat undesirable vegetation from the rip-rap.

20. Pond C
    a) Monitor previously reported washouts for future repair.
    b) Further collapse of the erosion barrier seems to be occurring with multiple small washouts forming on the east bank.
    c) Pond bank might be eroding in the southeast corner.
    d) Western bank had some light vegetation, please treat undesirables.
    e) Treat vegetation within rip-rap.

Landscape Summary, Clubhouse

General Updates, Recent & Upcoming Maintenance Events

- **Overall, landscape maintenance around the clubhouse and adjoining roadways is in good condition, with many plants continuing to rebound well from the recent frost. Some shrubs—particularly Ixora—are still showing stress, and an estimated 10–15% loss is expected as recovery continues. Turf areas across the parking lot, trail corridors, and monument sites show a mix of healthy regrowth and localized decline that will benefit from routine treatments and monitoring. Several locations along Bobcat Trail and near monument entries require focused turf recovery and weed management, while ornamental beds need occasional vine and weed removal. Frost-affected Crotons, Jatropha, and other ornamentals are showing gradual improvement, with follow-up monitoring recommended to identify any specimens that do not recover. Overall, observed issues are consistent with seasonal impacts and normal maintenance needs.**

The following are action items for Artistree to complete. Please refer to the item # in your response listing action already taken or anticipated time of completion. Red text indicates deficient from previous report. **Bold Red text** indicates deficient for more than a month. Green text indicates a proposal has been requested. Blue indicates irrigation. **Bold & Underlined** is info or a question for the BOS. Orange is items for Staff to address.

1. In the clubhouse parking lot beds, remove the declining Ixora shrubs requiring replacement. (Pic 1>)
2. Along the parking lot curbing, treat the emerging pavement weeds.
3. In the parking lot turf areas, browning turf visible, remove weeds, and review irrigation performance.
4. Near the clubhouse entrance, treat and replace the declining Ixora while maintaining the healthy saw palmetto.
5. Along Bobcat Trail heading west from clubhouse, treat the turf necrosis and die-back. (Pic 5>
6. Further west from clubhouse on Bobcat Trail, treat the additional turf decline areas.
7. Within the Bobcat Trail median, continue monitoring the Crotons and remove replacements for those not recovered by May.

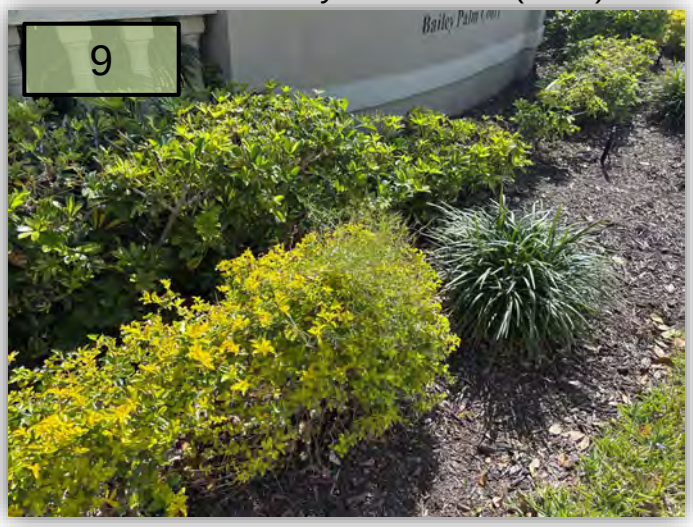

Bobcat Trail, Woodhaven, Bobcat Village

8. At the Kentia Palm Court monument, treat and monitor the turf for overspray runoff activity or pest/disease. (Pic 8)

9. Please remove vines/weeds from the shrubs in front of the Bailey monument. (Pic 9)

10. At the western monument on Lady Palm Way, treat the irregular turf growth and decline along the edge of the curb.

11. At the Coconut Palm Circle monument, treat the damaged turf areas. (Pic 11>)

12. At the entrance's southern monument landscape beds, treat the emerging weed pressure.

13. In the southern most median cap in Bobcat Village, turf has notably improved.

14. Still an area in the southern median cap on Bobcat trail that requires monitoring. Please investigate the cause. (Pic 14)

15. Jatropha that was previously hardcut back in the Bobcat village trail northern median is rebounding nicely. (Pic 15>)

16. The maintained areas along Woodhaven continue to be well maintained.

17. Between the maintained areas a breached area of the fence was observed, and it looks heavily trafficked. (Pic 17a>, 17b>)
